CLAIMS

What is claimed is:

10

15

20

- A bearing assembly having at least two bearing elements spaced by a first body, the first body having means for flexing.
 - 2. A bearing assembly as claimed in claim 1, wherein, in use, when a load is applied to the bearing assembly the first body is caused to flex.

3. (Amended) A bearing assembly as claimed in [either of claims] <u>claim</u> 1 [or 2], wherein the flexing means comprise at least one groove or notch formed on the first body.

- 4. (Amended) A bearing assembly as claimed in [any of claims] claim [1 to] 3, wherein the first body is substantially annular in shape, the at least one groove being formed on an outer surface of the first body.
 - 5. (Amended) A bearing assembly as claimed in [either of claims] claim [3 or] 4, wherein the groove is substantially U-shaped.
 - 6. (Amended) A bearing assembly as claimed in [any preceding] claim 5, wherein the first body is rigidly mounted to a body to which load is applied, in use.

Version slowing changes

- 7. (Amended) A bearing assembly as claimed in [any preceding claim] claim 5, wherein a first annular surface of the first body is provided with a first annular raceway.
- A bearing assembly as claimed in claim 7, wherein a second annular surface of the first 8. body is provided with a second annular raceway.
 - A bearing assembly as claimed in claim 8, wherein the first and second bearing elements 9. each comprise a plurality of balls, the first and second bearing elements being received for movement within the first and second annular raceways of the first body.

20

5

(Amended) A bearing assembly as claimed in [any preceding] claim 6, wherein the means 10. for flexing flexes about a longitudinal axis of the first body.

(Amended) A bearing assembly as claimed in [any of claims 4 to] claim 10 [when 11. dependent upon claim 3], wherein the groove is provided substantially circumferentially around 15 the first body.

(Amended) A bearing assembly [having at least two bearing elements spaced by a first 12. body, as in claim 1, wherein the means for flexing comprises a circumferential groove about the first body of sufficient depth so that the first body [being] is at least partly flexible under thrust load.

- 13. (Amended) A bearing unit comprising [at least one bearing assembly] a plurality of bearing assemblies according to [any of claims 1 to 12] claim 5.
- 14. A bearing unit as claimed in claim 13, wherein adjacent bearing assemblies are spaced by a second body.

- 15. A bearing unit as claimed in claim 14, wherein the second body is substantially annular in shape.
- 16. (Amended) A bearing unit as claimed in claim [either of claims 14 or] 15, wherein the second body is rigidly mounted to a further body to which load is not [(directly)] directly applied in use.
- 17. (Amended) A bearing unit as claimed in claim [any of claims] 14 [to 16], wherein a first annular surface of the second body is provided with a first annular raceway.
 - 18. A bearing unit as claimed in claim 17, wherein a second annular surface of the second body is provided with a second annular raceway.
- 20 19. A bearing unit as claimed in claim 18, wherein respective first and second bearing elements are received for movement within the first and second annular raceways of the second body.

BEST AVAILABLE COPY

- (Amended) A bearing unit as claimed in [claims 13 to] claim 19, wherein adjacent first 20. bodies are spaced by a respective first spacer element.
- (Amended) A bearing unit as claimed in claim [any of claims 13 to 20] 19, wherein 21. adjacent second bodies are spaced by a respective second spacer element.
 - (Amended) A bearing unit as claimed in claim [any of claims 13 to 21] 12, wherein a 22. further first spacer is provided between an end to which force is applied, in use and an adjacent end of an adjacent first body.

5

- (Amended) [A tool or] An apparatus including a bearing assembly according to [any of 23. claims 1 to 12] <u>5</u>.
- 24. (Amended) [A tool or] An apparatus including a bearing unit according to [any of claims 15 13 to 22] claim 19.
 - (Amended) [A tool or] An apparatus as claimed in [either of claims 23 or] claim 24, 25. [wherein the tool is a down-hole tool, eg.] for use in a borehole of an [oil/gas] oil well or gas well.
- 26. 20 (Amended) [A tool or] An apparatus as claimed in [any of claims 23 to 25] claim 25, [wherein the tool comprises part of a borehole drilling apparatus, which optionally includes] further comprising a down-hole motor.

- 27. (Amended) [A tool or] <u>An</u> apparatus as claimed in [any of claims 23 to 27] <u>claim 25</u>, wherein [the/a] <u>the</u> first body is rigidly mounted to a shaft to which load is applied, in use.
- 28. (Amended) [A tool or] <u>An</u> apparatus as claimed in claim 27, wherein the shaft is contained substantially concentrically within the bearing [assembly/unit] <u>unit</u>.

15

- 29. (Amended) [A tool or] An apparatus as claimed in claim [24 or any of claims] 25 [to 28 when dependent upon claims 23], wherein the second body is rigidly mounted to a housing.
- 30. (Amended) [A tool or] <u>An</u> apparatus as claimed in claim 29, wherein the housing [is] substantially concentrically surrounds the bearing [assembly/unit] <u>unit</u>.
 - 31. (Amended) [A tool or] <u>An</u> apparatus as claimed in claim [24 or any of claims] 25 [to 30 when dependent upon claim 24] wherein adjacent first bodies are longitudinally spaced by a first spacer element.
 - 32. (Amended) [A tool or] <u>An</u> apparatus as claimed in claim 31 [when dependent upon claim 27,] wherein the first spacer [elements is/are] <u>element is</u> mounted on the shaft.
- 20 33. (Amended) [A tool or] An apparatus as claimed in claim [24 or any of claims] 25 [to 22 when dependent upon claim 24], wherein adjacent second bodies are longitudinally spaced by a

second spacer element.

5

- 34. (Amended) [A tool or] An apparatus as claimed in claim 33 [when dependent upon claim
- 29], wherein the second spacer [elements is/are] element is mounted on the housing.
